

1. PRODUCT AND COMPANY DETAILS **Product** Name of Product: Saturated

Chemical Name: Saccharomyces cerevisiae

Chemical Family: Kingdom Fungi, species Saccharomyces cerevisiae

Composition: Proteins, nitrogenous substances, sugars, organic acids, DNA, and fat. It has a high concentration of living, functional microorganisms.

Details of the supplier of the safety data sheet Name of Company: WHC Lab Ltd.

Material Safety Data Sheet Saturated Dehydrated Yeast

Address: WHC Lab, Prospect Lower, Newcastle, Co. Wicklow, Ireland, A63 H0K8 **Emergency Contact Numbers**

Director - Tony O'Kane: +353 (0)87 948 3590

Quality & Sales - Philip Woodnutt: +353 (0)89 406 8622 Accounts - Judith Moss: +353 (0)86 896 1901

In case of an emergency please contact the local emergency services.

2. HAZARDS

Classification This product is not classified as dangerous according to CLP Regulation (EC) no 1272/2008.

Due to cell metabolism, rehydrating Saturated Dehydrated Yeast may release CO2. It may also release CO₂ if subjected to extremely high temperatures.

3. INGREDIENT COMPOSITION

4. FIRST AID PROCEDURES

Contact with Eyes:

Description of first aid procedures

Components

Saccharomyces cerevisiae 68876-77-7 99% Not classified Sorbitan monostearate 1338-41-6 1% Not classified (Emulsifier E491 - rehydration agent)

water for a minimum of 15 minutes.

Cas Registry Number

If contact occurs, immediately rinse eyes thoroughly with

Concentration

Classification (CLP)

Contact with Skin:	Use soap and water to wash. When exposed to yeast, some people may experience allergic reactions; in this instance, please contact a dermatologist or other medical provider.
Ingestion:	Consuming too much yeast with a high concentration can result in digestive issues like diarrhea and cramping. In this instance, drink a lot of water.
Inhalation:	In the event of CO ₂ release in a closed setting, which occurs when Saturated Dehydrated Yeast interacts with an aqueous solution, remove the individual to fresh air right away and call the local emergency services.
Allergens*	
Saturated Dehydrated Yeast does not contain added allergens. *EU Regulation 1169/2011 (Food Information Regulations) (Annex II)	
Symptoms and effects	
Effects both immediate and delayed are further indicated in section 11.	
5. FIRE FIGHTING MEASURES	

Use the appropriate tools or media, such as water, foam, carbon dioxide, or dry powder, if

There is a low risk of fire and explosion, under typical circumstances for handling, storing,

Saturated Dehydrated Yeast can produce CO₂ at extremely high temperatures.

Put on self-contained breathing apparatus and safety gear for firefighters, such as boots, gloves, and goggles etc.

Environmental precautions

another collection technique.

Fire Suppression

involved in a fire.

6. ACCIDENTAL RELEASE CONTROLS Safety measures, protective gear, and emergency procedures Wash with water using gloves, boots, and eye protection. If there is a CO₂ release and you're

Saturated Dehydrated Yeast is not considered to be environmentally hazardous, but it

In the event of a small or large spill or leak, Saturated Dehydrated Yeast is solid and

shouldn't be handled as hazardous waste. It should be removed using a vacuum cleaner or

Rehydrated materials should be sent for sewage treatment after being heavily diluted with water. Saturated Dehydrated Yeast decomposes naturally.

intended for contact with food), and FDA CFR 21 (174-179) (USA).

packs in a refrigerator (0°C to 10°C) and use promptly. Please note expiry date on packs prior to opening.

in a closed space, use ventilation or breathing apparatus.

should be disposed of properly, given its high organic content. Techniques and supplies for containment and cleanup

Packaging Materials Saturated Dehydrated Yeast is available in 500g vacuum-packed silver foil packs. This material complies with relevant food-contact legislation, including, EU Regulation

1935/2004 (materials intended for contact with food), EU Regulation 1245/2020 (plastic materials intended for contact with food)), EU Regulation 2023/2006 (GMP for materials

Storage Conditions: Store at cool to ambient temperatures (ideally 5°C to 15°C), dry, and

Handling: Once opened, re-seal to keep out air and water. For best results, store re-sealed

To prevent fires and explosions: Saturated Dehydrated Yeast has a low fire and explosion

Shelf life: 3 years from date of production, if vacuum seal is not broken, and if stored as outlined above.

Note: When added to water or a water solution, Saturated Dehydrated Yeast releases CO₂, especially on substrates high in sugars or starch. Ensure adequate ventilation to keep levels below advised exposure limits. **Precautions**

thoroughly with cleaning supplies after.

Avoid eating, drinking or smoking while performing the procedure, and wash your hands

Use air-tight containers. Avoid the container leaking. Control spills and residues by safely

especially on substrates high in sugars or starch; ensure adequate ventilation to keep levels

Controlling the CO₂ levels should be possible with just adequate general ventilation. There is no need for specialized respiratory protection unless access to tanks where fermentation

Staff members must wear dust protective masks if Saturated Dehydrated Yeast is handled

Before using this product, a thorough risk assessment should be done to determine the best personal protective equipment for the local environment. Equipment for personal

protection should adhere to the applicable EN standard.

Explosive properties:

10. STABILITY/REACTIVITY		
Conditions to avoid		
Lack of stirring following rehydration. Dust is produced by vigorously shaking Saturated Dehydrated Yeast. High-temperature storage.		
Chemical stability		
Stable when stored according to recommendations. Chemical stability of this material is guaranteed by the storage and handling conditions.		
11. TOXICOLOGICAL INFORMATION		
Information on toxicological effects		
Toxicity:	Even at high doses, there is no acute toxicity.	
Oral:	Large doses may irritate the digestive tract when consumed. For typical industrial handling, the risk is low.	
Respiratory:	May irritate the respiratory tract. For typical industrial	

handling, the risk is low.
